## ViLLE exercise guide

In Exercise editor you select a name for exercise. You can set a title for exercise in Question text box. Then you set start and end years for timeline and you can set resolution also. (1 = every year is displayed) After that you write events to column "Tapahtuma" and correct year to column "Vuosi".

In Exercise Executor you drag event from "Tapahtuma" table to "Aika" table. You may need to scroll down to get correct year visible. After dropping the event to year it is shown in "Vuosi" table at same row as event is in "Tapahtuma" table.

## Item is dragged to correct year.

After clicking "Submit" button you get your result shown in notification.
